

Majestic - Number One In Indoor Bumper Car Rides

Custom Themed Cars • HIGH PROFITS
Lowest Maintenance Indoor Floor Pick-Up System

Majestic adds new and exciting dimensions from design to production with every Floor Pick-Up ride produced. Our models are designed to give you maximum profits, as well as pure customer satisfaction. Each model includes state-of-the-art features for customer safety.

We use only non-corrosive, non-rust materials that provide bright, attractive rides. This not only adds eye appeal to your customers but it reduces your upkeep and cleaning costs.

Specifications

Floor Pick-Up Scooter® Bldg.

State-of-the-art design technology and materials are incorporated into every Floor Pick-Up Ride Building produced. This includes stainless steel floors using a specially designed process for assembly. The studs fasten the floor to insulators under the flooring, thereby eliminating counter sunk holes or screwheads on the running surface. The stainless steel floor plates are then over-

lapped to remove gaps in the floor surface. Throughout the building construction, there is the extensive use of sturdy aluminum tubing and walkway plates. All these features are incorporated to provide maximum patron safety and protection.

Precision design, construction and quality stainless steel materials are used exclusively for the guaranteed longevity of your investment.
