

Quadzilla®

Quadzilla is Majestic's all new ride that is designed and built as a family themed, continuous ride.

The exciting breakthrough is that this concept is a theme park ride with portability. This self-contained ride can be set up and moved with the same ease and cost effectiveness as you have come to expect from Majestic.

There is a great deal of realism in the design of the dune buggy, aptly called the Quad Crusher, with its bright colors and the 21st Century look. The dynamic looking tires of the quad give it a feeling of power and excitement. Add to this, flashing lights, engine sounds and laser weapons and you have all the thrills and excitement for which kids are looking.

The ride consists of 5 to 6 sleek, powerful dune buggy-styled cars that begin their quest to conquer the 4 headed creature, QUADZILLA! It starts with the cars flashing through the desert-like scenery, past an Aztec waterfall and then roaring through the mouth of the cave of Quadzilla's mountain habitat.

The Quad Crushers then do a series of turns and climbs, crossing a bridge and bringing them down into the cavernous mountain lair to discover the Treasure of Quadzilla, and the ride's finale.

Specifications Quadzilla®

The Quadzilla ride is constructed mainly of aluminum for lower maintenance and high portability. All elements of this ride are compactly placed to provide ease of off loading and assembly.

RIDE TYPE: Family-Themed Continuous Ride

MAXIMUM CAPACITY PER CAR: 1 Adult and 1 Child or 2 to 3 Children
